Clinical Tuberculosis 2024

Dear colleagues,

Never before in the history of mankind were more individuals on earth affected by tuberculosis, than currently. At the same time, tuberculosis – once a highly prevalent diseases in Western Europe – is close to elimination in the European Union and the European Economic Area.

The DZIF Clinical Tuberculosis Course 2024 summons clinicians, practitioners, scientist, public health workers, and colleagues from allied disciplines to provide latest updates on the prevention, diagnosis and treatment of tuberculosis and to provide a discussion forum with world leading experts on TB management, control and elimination.

It is an honor to announce the 2024 Visiting Professor in Tuberculosis at the Research Center Borstel, Dr. Zarir Udwadia, from Mumbai, India. In his keynote lecture he will address the situation of tuberculosis in India, where more than ¼ of humans currently affected by this disease live.

In a satellite workshop, Dr. Leonardo Martinez from Boston, USA, will present practical aspects of conducting and evaluating systematic reviews and meta-analyses. The workshop is limited to 15 fellows: First come- first serve.

Be cordially invited to join us in Borstel during the middle of the summer!

With best regards,
Anna-Maria Mandalakas & Christoph Lange

SATELLITE WORKSHOP

„Systematic reviews and meta-analyses“

Leonardo Martinez
Boston, USA

Thursday, 20th June 2024

09:00 - 12:00 am

Manor house of the Research Center Borstel

An interactive workshop for

- Physicians & Scientists
- Public health care workers
- Research oriented students

The number of participants is restricted to 15.
