

Documentation and Archiving

We support you in comprehensible and complete documentation of scientific experiments

Protocols / Documentation

- Reproducibility
- Accessibility / transparency
- Identification of samples and reagents
- Creation of Standard Operating Procedures (SOP)
- Exchange between research groups

Elektronic Laboratory Notebook

- Elektronic online documentation
- Full Audit-Trail

How does this support GSP:

- Structured documentation
- Data integrity and security
- Personalized entries
- Secure and central storage

We support you in archiving of original data in publications:

- Structured documentation of all original research data and their processing to figures in publications using the documentation form
- Transfer to RCB Central Data Archive

How does this support GSP:

- Structured **documentation** becomes part of the processing of research data.
- The path of the data from individual experiments to figures in a publication is **clearly assigned**.
