

GSP Introduction for new Employees

What we do:

- New employees in the research group are familiarized with the Borstel model in a GSP welcome meeting
 - We provide information on the regulations for safeguarding scientific integrity, the GSP toolbox on the FZB intranet and the role of the scientific integrity scouts
- For this purpose, there are GSP training presentations, a GSP flyer and a welcome folder in the research groups

How does this support GSP:

- New employees are familiarized with the GSP culture and the regulations at the FZB and sensitized to the topic
- Contact persons are known
- GSP is established as part of the research process
